

Interview with mom

Prescott unified school district

Speech Therapy Svcs in the special ed dept

Grades k – 4, sometimes grade 7

For speech & language & fluency & articulation svcs

Technology used:

iPad & various apps, tounge placement for specifics sounds

Research speech apps

Very helpful to help student visualize where to put tounge, since it's impossible for anyone to physically show where to put tounge. The app shows something like a moving diagram.

Other apps: bilingual apps, stuttering is fluency in speech pathology

Align goals with common core standards, has to be reviewed every year with IEPs

Dynavox AR research this device, students push icon and it speaks for them

Go talk, research
